Nuclear Medicine

Please phone for an appointment for all examinations except general X-ray.

Please bring all previous scans

Online images and reports
Visit www.envisionmi.com.au for details and to arrange your login.

Bookings: Tel: 08 6382 3888 Fax: 08 6382 3800 Email: bookings@envisionmi.com.au

Please phone to arrange an appointment or email us and we will contact you with a convenient time and day. Please fax the front of this form prior to your appointment.

Envision Medical Imaging is a private billing practice with payment required on the day of your examination.

Free Parking is available at the rear of the building.

Please note: Due to a traffic island you cannot turn right into Connolly Street if heading West on Cambridge Street.

If using Public transport there is a **bus-stop** immediately in front of our building (Route No. 81, 84, 85, 91, 92, 95) Subiaco train station is less than a 5 minute stroll.

MRI Patient Information

You have been referred to Envision to have an MRI (Magnetic Resonance Imaging) Scan. We are proud to inform you that this is currently WA's least claustrophobic scanner. The wide magnet bore (the part you lie in) is also the shortest in Perth, making it a more comfortable experience for you, compared with other MRI scanners. Most importantly, the excellent image quality allows for accurate diagnosis by our specialist MRI Radiologists.

Our aim is to make this experience as pleasant as possible for you. We encourage you to bring along a phone or i-Pod of your favourite music for you to listen to during your scan (alternatively we can provide a selection of music for you.)

The MRI scanner will make various tapping or buzzing noises as part of the normal process of acquiring your images. A scan of a single region generally takes between 15 - 25 minutes, though some more complex studies can take a little longer.

MRI does not use ionizing radiation like X-rays or CT scanning. The MRI Scanner is however, a very powerful magnet so some patients with certain implants or metallic/electronic devices cannot have an MRI scan. If you have questions, or any of the following devices please contact our helpful MRI staff prior to coming in for your appointment on (08) 6382 3888:

YOU CAN'T HAVE AN MRI SCAN IF YOU HAVE THE FOLLOWING:

Pacemaker / Defibrillator
Neurostimulator
Cochlear Implant

YOU MAY NOT BE ABLE TO HAVE AN MRI SCAN IF YOU HAVE THE FOLLOWING:

Aneurysm Clip (Brain)
Stapedectomy (Inner Ear)
Morphine / Insulin Pump
AAA Stent (Aorta)
Programmable VP Shunt

Most metal screws, clips & rods used in surgery are safe to be scanned as they are made of titanium (non-magnetic), but we will ask you about these on the day of your scan. Similarly cardiac (coronary) stents and valves are considered safe to be scanned.

MRI Fee Information

Due to restrictions imposed on MRI access throughout Australia, most of our MRI scans do not attract a Medicare rebate; with the exception of specific adult (over 16 years old) – head, spine, knee scans and paediatric (under 16 years old) – head, spine, knee, hip, elbow, wrist scans referred by General Practitioners. At Envision, your Specialist, GP, Physiotherapist, Podiatrist or other health professional can refer you directly for an MRI at an affordable price. Most other radiology practices require you to have a specialist's referral.

There are further advantages for you:

1. You will be able to get a scan quickly and therefore be able to receive any required treatment from your Doctor much sooner.
2. MRI is often superior to other imaging modalities meaning you can potentially avoid having other unnecessary radiation scans or tests.

Having your MRI scan at Envision will likely save you time whilst giving you an accurate diagnosis on the most comfortable, high quality MRI Scanner in Perth.

Please note that payment will be required on the day of your examination.
