

# INFORMATION & CONSENT FORM

## PV ANGIOGRAM

### Introduction

The scan your doctor has asked us to perform may require the injection of contrast medium. This is a medical dye used to allow or improve detection of abnormalities in the body. The intravenous contrast is iodine based.

**If you have any allergies to X-ray dye or iodine, please inform the staff member prior to commencing the scan.**

*Please ask questions about anything on this form that you do not understand.*

### Risks and side effects

As with most drugs, side effects and adverse reactions are possible. These may occur during or after the procedure.

Side effects associated with the procedure may include a feeling of warmth or a metallic taste in the mouth. Occasionally side effects such as nausea or rash (*hives*) may occur. More severe allergic reactions may result in shortness of breath and facial swelling. It is extremely rare for reactions to be life threatening.

***I have read the information provided regarding my procedure. I understand the information and have had the opportunity to ask questions about what is going to happen, the reasons for the procedure being performed, and the associated risks. I agree to have the procedure performed.***

**To further reduce the risk of an adverse reaction it is important that you answer the following questions.**
